

Åldersbedömning- magnetkameraundersökning av tillväxtzonen i lårbenets nedre del/ Age estimation by magnetic resonance imaging of the knee, rapport 333 (2021)

Bilaga 6 Sammanställning av risk för bias av inkluderade studier/ Appendix 6 Risk of bias chart

Studier som ingår i rapporten (måttlig och låg risk för bias/Studies included in the report (low and moderate risk of bias))

green= low risk

yellow= moderate risk

red=high risk

Author	Is the MR protocol well described?	Age Mimicry: even age distribution?	Could the selection of patients have introduced bias?	Could the conduct or interpretation of the index text have introduced bias?	Could the patient flow have introduced bias?	Total bias	Comments
Alatas 2021	Green	Red	Green	Yellow	Green	Yellow	Minority of the image was evaluated by 2 observers
Altinsoy 2020	Green	Red	Green	Green	Green	Green	
Auf der Mauer 2019	Green	Red	Yellow	Green	Green	Yellow	
Daghighi 2021	Yellow	Red	Green	Green	Green	Yellow	
Dedouit 2012	Yellow	Red	Green	Green	Green	Yellow	
Ekizoglu 2021	Green	Red	Green	Yellow	Green	Yellow	Re-evaluation not blinded
Gurses 2020	Green	Red	Green	Green	Green	Yellow	
Krämer 2014	Green	Red	Green	Yellow	Green	Yellow	Minority of the image was evaluated by 2 observers
Kvist 2020	Green	Green	Yellow	Green	Green	Yellow	
Margalit 2019	Yellow	Red	Green	Green	Yellow	Yellow	

Ottow 2017							Minority of the image was evaluated by 2 observers,
Uygun 2020							Unclear how many of the images that had been evaluated by two observers,
Vieth 2018							Minority of the image was evaluated by 2 observers

Studier med hög risk för bias/Studies with high risk of bias

Author	Is the MR protocol well described?	Age Mimicry: even age distribution?	Could the selection of patients have introduced bias?	Could the conduct or interpretation of the index text have introduced bias?	Could the patient flow have introduced bias?	Total bias	Comments
Ekizoglu 2016							Unclear chronological age (only year of birth)
El-Din 2019							
Herrmann 2020
